## ELECTRIC STORAGE WATER HEATERS

- Thermoindicator
- Safety valve
- Flange for easy maintenance
- Light indicator
- Glass ceramic protection
- External regulation
- Magnesium anode
- Thermo cut-off
- High efficiency insulation

PROMOTEC electric storage water heaters are produced by the latest modern technology of glass-ceramic coating of the water tank.

The glass-ceramic protection assures reliable protection against corrosion together with flawless hygiene of the water and guarantees long useful life of the water tank.

State of the art Plasma welding method used for the production of PROMOTEC water heaters' tanks. Stable and higher grade welding process based on lower welding temperature with no using of extra materials. Computerized control assuring high quality.
